

Operational guidelines of the kihz Oerlikon/Chinderhuus BABAR

Effective 1 September 2023

These operational guidelines are based upon the current legal framework, the statutes of the Childcare Foundation for the Zurich University Area (kih) and the service agreements with the partners ETH Zurich, University of Zurich, Empa and Eawag and the Social Department of the City of Zurich. The operational guidelines are issued by the management of the kihz Foundation and regulate the rights and obligations of both the kihz Foundation and the parents or guardians with regard to childcare in the kihz Oerlikon/Chinderhuus BABAR. These operational guidelines form an integral part of the contract between the parents or guardians and the kihz Foundation.

1. Administration and operation

The kihz Oerlikon/Chinderhuus BABAR is a collaboration between the kihz Foundation and Chinderhuus BABAR GmbH.

2. Childcare services

The kihz Oerlikon/Chinderhuus BABAR takes care of children from the age of 3 months to kindergarten age. The settling-in phase can begin from the age of 2 months. Children are cared for in baby groups or in mixed age groups. Bookings are made on the basis of full days, mornings including lunch or afternoons without lunch. If required, individual additional days can be booked. These will be billed separately by Chinderhuus BABAR GmbH and are not subsidised.

3. Opening times and holiday closures

The kihz Oerlikon/Chinderhuus BABAR is open from Monday to Friday all year with the exception of the period between Christmas and New Year as well as two weeks in summer (end of July / beginning of August). The kihz Oerlikon/Chinderhuus BABAR is closed on official public holidays. Any exceptional closures will be announced two months in advance.¹

4. Premises

The daycare centre supervisory authority (Krippenaufsicht) of the City of Zürich determines – on the basis of the size of a building – how many groups may be permitted in one building and sets the maximum permitted number of children per group. The kihz Oerlikon/Chinderhuus BABAR has rooms in which to eat, play and sleep. The daycare centre has a safe outdoor area which enables outdoor play in any weather.

5. Nutrition

Meals eaten during daycare hours are included in the fees. The main meals are prepared by the ZFV (Zürcher Frauenverein) and picked up warm by the Chinderhuus BABAR. Snacks and puréed baby food are prepared on the Chinderhuus BABAR premises. Sweetened drinks and sweet foods are avoided as far as possible. The menu plan is publicised and available in each children's group.

Staff are considerate of children's allergies/intolerances and respect different religions and their principles. Parents or guardians are free to bring prepared meals if they have special religious requirements or if their child is required to follow a specific diet. The kihz daycare centres do not

provide extra meals based on personal needs.

6. Quality

The kihz daycare centres are committed to following a systematic quality development process that is subject to regular external evaluations. Targeted further education and training courses as well as group discussion sessions are highly valued and form an integral part of the quality assurance process.

Every two years, the kihz Foundation issues a survey to parents and guardians to ascertain their satisfaction levels and needs. The Foundation makes the relevant optimisations as far as is possible.

7. Staff

Staff are appointed in line with the cantonal guidelines which specify the qualifications for the position as well as the ratio of caregivers to children. Each children's group is led by two professionally qualified caregivers. Since the Chinderhuus BABAR GmbH offers training jobs, caregivers may also include staff in practical training and apprentices. The Head of the Oerlikon/Chinderhuus BABAR is responsible for running daily operations and works closely with the central management team of the kihz daycare centres.

8. Collaboration between parents and guardians and the kihz Foundation

Personal meetings between parents or guardians and caregivers are held once a year and form the basis for a sustainable relationship that ensures the child's well-being. Extra meetings can be requested either by staff members or by the child's parents or guardians as required.

To enhance the relationship and allow the opportunity for further exchange, various events are held. Parents and guardians are kindly asked to help at these activities.

9. Presence, absence and handover

For efficiency in the event of an evacuation, the children's presence on the daycare premises is consistently recorded. A child's non-attendance is to be communicated to the daycare staff by 9.45 am at the latest on the day of absence.

When being picked up, children will only be handed over to their parents or guardians, or a person authorised to do so. Such persons and any other contact persons must be able to provide identification.

10. Healthcare, administration of medication, and communicable diseases

A child can only attend the daycare centre if healthy. Children with communicable diseases or who have lice are not allowed to attend the daycare centre. A medical assessment is required to determine whether the siblings of children with communicable and infectious diseases may attend the daycare centre. Any acutely communicable disease in the family must be reported to the daycare centre immediately.

If the daycare centre staff establish that a child is ill, the parents or guardians are informed immediately. They need to be reachable by telephone at all times and must collect the child immediately. As a rule, daycare centre staff are not allowed to administer medication to the child. Exceptions may be made in individual cases where special conditions prevail. In such cases, medicines are only accepted and administered in their original packaging, and with the package instructions. In the case of prescription medication, the doctor's written prescription must be provided. In addition, written authorisation from the parents is required by filling out the relevant form. Only the qualified caregivers are permitted to administer medication.

Parents or guardians must agree that any doctor may be consulted in an emergency.

The Administration Office of the kihZ Foundation and Chinderhuus BABAR must be informed about the immunity status of the child (copy of the vaccination card), so that the authorities can focus their measures on the non-immune children in the event of an outbreak with acute risk of infection.²

Special conditions apply in relation to measles. Like the rest of Europe, Switzerland has resolved to eliminate measles on its territory. This goal can be achieved if 95% of the population is immune to measles from the age of two years and if rapid action is taken when measles is suspected. Unvaccinated children who have had contact with a person suffering from measles can be excluded from the daycare centre by the municipal or cantonal medical service for a maximum of 21 days.³

11. Insurance and liability

Parents and guardians are obliged to take out accident and liability insurance for their child. Neither the kihZ Foundation nor the Chinderhuus BABAR GmbH is liable for the loss or damage of personal effects.

The kihZ Foundation and Chinderhuus BABAR GmbH are only liable in cases of gross negligence. Furthermore, the liability extends only to compensation for typical and foreseeable direct damages, but not to indirect damages such as loss of profit, salary, etc. The costs for parents and guardians arising from an extraordinary closure of the daycare centre are not carried by the kihZ Foundation nor by the Chinderhuus BABAR GmbH.

12. Updating of key data

Parents and guardians are obliged to report in writing any changes in their key data concerning their address, income (parental contribution factor) and workload percentage. Income and workload percentage are to be proven with officially recognised documents.

13. Data protection and security

Information on data security can be found on the www.kihz.ch website.

14. Use of image, audio and video material

When signing the contract, parents and guardians declare their consent to the use of image, audio or video recordings to document the educational and developmental steps of their child. Image, audio or video material will be created and used without additional permission of the parents and guardians solely for educational purposes (documentation) or for marking personal utensils. The distribution of image, audio or video material within the children's group or daycare centre must be specifically authorised by the parents or guardians. When the child leaves the daycare centre, all recordings are deleted, at the latest in the month following the month in which the child left. Parents or guardians and staff must pledge to handle all image and audio material from the daycare centre with care. Parents, guardians and staff are strictly forbidden to share any kind of image or audio recordings outside of the daycare centre without the written authorisation of the parents or guardians.

To use a specific image for public purposes (press, website, brochures etc.), parents and guardians will be specifically asked for their written authorisation.

15. Extraordinary closure of daycare centres by order of the authorities

If the operation of the daycare centre is restricted or completely closed down by order of the authorities, individual provisions of these guidelines can be declared invalid during the state of

³ See Epidemic law; SR 818.101

emergency. In this case, parents and guardians will be informed in writing.

16. Changes to the operational guidelines

Any changes to the operational guidelines will be communicated to parents and guardians in writing at least three months before coming into effect.

Approved by the Management Board of the kihz Foundation and Chinderhuus BABAR GmbH on 30.04.2023
